📍 Samakhushi, Kathmandu

SUMMARY

Passionate Laravel developer with experience in developing web applications in PHP, Laravel and MySQL. I enjoy building functional and dynamic web applications using efficient code. I'm a quick learner and always eager to learn new concepts and accept challenges. I'm passionate about learning and contributing my skills to projects in a professional environment.

EXPERIENCE

Laravel Internship

[Kumari Job](#) 2024/10/23 - Present 📍 Hattisar, Kathmandu

Implemented new features update in the job board www.kumarijob.com

- Collaborated with the team to resolve bugs, implemented features and enhancements like search autocomplete, email verification using OTP, REST API in Company Laravel-based web application, CRUD, profile update and dashboard update, etc.
- Learned foundations of Laravel including MVC, routing, Eloquent ORM, components, roles and permissions, seeding, middleware, jQuery, AJAX, Fetch API, and build e-commerce application.
- Learned Event and Listeners, Queuing, Observers and Model Events, Query Scopes, Action and Service Classes, Task Scheduling, Console Commands, Chunking, Eager Loading, and Soft Delete.

Personal Projects

Child Vaccination System

- Created a web application to manage child vaccination records including vaccine scheduling, SMS reminders, and reporting using PHP. <https://github.com/MeSabin/Child-Vaccination-System.git>

School Management System

- Developed a platform to streamline school operations including Teacher and Student management, module creating, Assignment tracking, etc. using Laravel and Tailwind CSS. <https://github.com/MeSabin/School-Management-System.git>
